Response to “the government’s new policy on wearing masks”

In regards to the subject matter, the government’s new policy on wearing masks will be applied from March 13, 2023.

However, considering the infection risks in the University Hospital on Shikata campus, we would like to ask for your continued cooperation in wearing masks to prevent infection.

The policy of wearing masks in lectures from the new semester will be notified after the reviewed university-wide policy is announced.
