Measures related to the Novel Coronavirus (COVID-19) Infection after May 8, 2023

1. Duration of self-isolation

As of May 8, 2023, in the case of COVID-19 infection, the self-isolation period is as follows.

The purpose of this measure is to ensure the safety and security of all the students and medical care system, and to encourage all of you to act responsibly as a medical professional.

	Self-isolation period	
	When infected	Had close contact
Clinical trainees	7 days	5 days
Non-clinical trainee	7 days	5 days

* Starting and ending dates of the above period will be instructed by the Instruction and Student section of each faculty/graduate school upon investigation.

* Depending on the symptoms, the above period may be extended.

* In the case of close contact, if the result of a PCR test taken after 48 hours of the next day following the day of the last contact is “negative”, the self-isolation period can be ended.

* For all students of the School of Pharmaceutical Sciences, “Clinical trainees” is applicable.

2. Authorized absence during the self-isolation period

Duration of the self-isolation period mentioned in 1. will be considered as the “authorized absence”. Please submit the “Notification of authorized absence” following the instruction by the Instruction and Student section.

3. Other

- Please take the necessary measures to prevent infections on a daily basis.
- If you have the symptoms of the common cold, etc., please take a test using the COVID-19 antigen test kit (officially approved by the Japanese government) on your own.
